

Slated to start construction in 2007, the Student Services Building will be a new “green-certified,” 46,500 square foot, three-story complex housing a multitude of student services under one roof, including the Career/Transfer Center, Admissions and Records, Financial Aid, Counseling, Disabled Students, Health Services, International Students, High School Outreach and Administration.

Pierce College is located in the western San Fernando Valley in Woodland Hills. At Pierce College, visitors to John Shepard Stadium will be treated to a new wireless football scoreboard. Plus, the Performing Arts Center has received several fire/life safety upgrades. The Soils Laboratory has been demolished to make way for the Infrastructure Project. In addition, the Temporary Facilities Project is underway. These facilities contain classrooms and faculty offices that will be used while the main buildings on campus are renovated.

PIERCE COLLEGE
